

Click this button!

The screenshot shows the Terraform Module Registry website in a web browser. The browser's address bar displays the URL `https://registry.terraform.io`. The website's header features the Terraform logo and the text "Module Registry" on the left, and navigation links "Browse" and "Publish" on the right. The "Publish" button is highlighted with a red rectangular box, and a red arrow points from the text "Click this button!" to it. Below the header, the main content area has a blue background with a white grid pattern. It contains the title "Terraform Module Registry" and the subtitle "Discover modules for common infrastructure configurations for any provider". A search bar with the placeholder text "Popular searches: vault, aws, database" and a magnifying glass icon is centered. Below this, the section "Find Terraform Modules" is followed by the text "Use and learn from verified and community modules". At the bottom, the "POPULAR MODULES" section displays two modules: "aws security-group" and "aws vpc", each with a verified badge icon.
