

**Name of block**

```
dynamic "step" {
```

```
  for_each = local.steps — Complex value to  
                           iterate  
  content {
```

```
    name = step.value.name
```

```
    args = step.value.args
```

```
    env  = lookup(step.value, "env", null)
```

```
  }
```

**Current value accessor**

```
}
```
